

Mu-ming Poo is the scientific director of Center for Excellence in Brain Science and Intelligence Technology, Institute of Neuroscience, Chinese Academy of Sciences, and Paul Licht Distinguished Professor in Biology Emeritus at University of California, Berkeley. He studied physics at Tsinghua University (Taiwan) and received PhD in biophysics from Johns Hopkins University. Since 1976, He had served on the faculty of UC Irvine, Yale, Columbia, and UCSD, and UC Berkeley. His main research interest is to understand the cellular mechanisms regulating the formation and plasticity of neural circuits. His recent interest is to use non-human primates as animal models to study higher cognitive functions and human brain disorders. His team in Shanghai succeeded in cloning macaque monkeys from somatic cells in 2018, a milestone in biotechnology. He is a member of Chinese Academy of Sciences, US National Academy of Sciences, Academia Sinica, and Hong Kong Academy of Science. He was awarded Ameritec Prize (2001), P. R. China International Science & Technology Cooperation Award (2005), Qiushi Distinguished Scientist Award (2011), and Gruber Neuroscience Prize (2016). He currently serves as an editorial board member of *Neuron*, Editor of *Developmental Neurobiology*, and Executive Editor-in-Chief of *National Science Review*.
