

Prof. **Linda J. Richards** AO, PhD, FAA, FAHMS is a Professor of Neuroscience and Deputy Director (Research) of the Queensland Brain Institute (QBI) at The University of Queensland.

She is an National Health and Medical Research Council (Australia) Principal Research Fellow, Past President of the Australasian Neuroscience Society and Co-chair of the Australian Brain Alliance, which is promulgating the case for a National Australian Brain Initiative to the Federal Government. Prof. Richards represents the ABA on the Strategy Committee of the International Brain Initiative and is a Spokesperson for the IBI. She founded the Australian Brain Bee Challenge in 2006, a competition for High School Students to learn about the brain and is the Patron and a Scientific Advisor for the support group, AusDoCC, for individuals with callosal dysgenesis and their families. Prof. Richards research focuses on how neural circuits form during brain development and the underlying causes and behavioural and cognitive consequences of developmental brain disorders of the cerebral cortex.
